# HOSPITAL CLIPS PATIENT RESTRAINT SIMPLIFIED

## EFFICIENCY MEETS SAFETY

Immobilizing uncooperative patients quickly is critical to provide best care and to ensure safety for everyone involved. **XDcuff®** provides high-vis anchoring positions, making limb restraint application fast and easy.

Eliminating knots and improving access to anchoring locations, has proven to significantly reduce application times in scenarios. Transfer from ambulance stretchers is also a breeze where **XDcuff®** is used.

## KEY FEATURES

- ✓ Unique anchors provide a standard connection point to **Stryker BigWheel®** bed.
- ✓ Connects with EMS stretchers where **XDcuff®** is used.
- ✓ Utilizes the trusted **YKK®** brand, quick release buckles (450LB rated).
- ✓ **Biothane®** coated webbing for easy cleaning and durability.
- ✓ Reusable, disposable and metal anchoring options available.

## 450LB YKK® BUCKLE

1. Wrist neoprene cuff.
2. Double folded tail design for easy install.
3. Side-by-side of clip options.
4. Left ankle and left wrist positions (right wrist and right ankle on opposite side).
5. **PAX®** bag+**XD®** strap for cuff storage option.
